

East Contra Costa County Habitat Conservancy Public Advisory Committee Members Needed Request for Applications

Overview

The East Contra Costa County Habitat Conservancy is seeking four (4) individuals or organization representatives to serve on the Public Advisory Committee (PAC) to provide input on the implementation of the East Contra Costa County Habitat Conservation Plan / Natural Community Conservation Plan (HCP/NCCP or Plan) to the Conservancy's Governing Board. The PAC is composed of members representing a variety of interest groups, including three members from the development community, three representatives from the conservation community, three private landowners and/or agriculturalists, three representatives of suburban and/or rural residents within the Plan area, as well as staff members from interested public agencies. PAC members are appointed for a four-year term and are expected to attend all PAC meetings.

The current vacancies are for:

- 1 private permit seeker from the development community
- 1 representative from the conservation community
- 1 private landowner and/or agriculturalist (or their representatives)
- 1 suburban or rural resident from the Plan Area

The PAC meets quarterly and is responsible for reviewing and commenting on the general implementation processes of the HCP/NCCP including providing input on implementation policies, budgeting, workplan, restoration projects, a small research grant program, the operation of preserves, adaptive management, and the adherence to plan commitments. For more information on the HCP/NCCP and the role of the PAC visit cocohcp.org. The PAC meets on the 2nd Thursdays at 1 pm of February, May, August, and November.

Background information on the East Contra Costa County Habitat Conservancy: The East Contra Costa County Habitat Conservancy is a joint exercise of powers authority formed by the Cities of Brentwood, Clayton, Oakley and Pittsburg and Contra Costa County to implement the East Contra Costa County Habitat Conservation Plan / Natural Community Conservation Plan (HCP/NCCP or Plan). The HCP/NCCP provides a framework to protect natural resources in eastern Contra Costa County, while improving and streamlining the environmental permitting process for impacts on endangered species. The Plan will allow Contra Costa County, the Contra Costa County Flood Control and Water Conservation District, the East Bay Regional Park District and the Cities of Brentwood, Clayton, Oakley, and Pittsburg (collectively, the Permittees) to control endangered species permitting for activities and projects in the region that they perform or approve. The Plan also provides for comprehensive species, wetlands, and ecosystem conservation and contributes to the recovery of endangered species in northern California. The Plan avoids project-by-project permitting that is generally costly and time consuming for applicants and often results in uncoordinated and biologically ineffective mitigation.

Additional Information Provided
